## **Description**

To sensitize local's community about the environmental changes and issues and plantation and awareness raising campaign was arranged at Nathiagalli. The teachers and students of Beacon School System Jinnah Abad campus and Govt Primary School Nathiagalli participated in the said event.

The Headmistress Beacon School System in her address highlighted the importance of plantation and environmental issues, she said the forests are our assets and it is our prime duty to preserve the forest/trees and spread awareness among the local community to cope with the challenges of the global environment.

Director GDA Mr. Khalid Khan while addressing the participants expressed that survival of forest is essential to maintain the eco-system. To save the environment there is a need of environmental education among the general public to minimize the air, land and water pollution. For green Galliyat such type of programs are required so that local community may get awareness about threats being faced to the dense forests.

Sardar Khalid Coordination Officer GDA (Organizer of this event) in his closing remarks thanked all the stake holders specially the management of both the schools for the active and effective participation.

At the end children of the schools planted trees of citrus, Deodara. A walk from Dak Banglow to church was held.

The campaign ended successfully by the grace of all mighty Allah.
